The results of this testing are used to help ensure our clients are maintaining the appropriate level of compliance.

Responsibilities include:

- Travelling to customer sites to collect water samples. At the site you will be interfacing with facility engineers, infectious control managers, others
- Shipping water samples to laboratory for testing
- Document field service activities
- Assist local Barclay field engineers with identifying potential new opportunities within existing accounts.

Qualifications include:

- B.S. degree required, degree in environmental, biology or chemistry would be preferred, but not required
- A background in water treatment is helpful but not required
- A minimum of 3 years work experience is preferred
- Strong organizational and time management skills
- Excellent communication skills
- Valid driver's license with a good driving record
- Must be authorized to work in the United States

Barclay Water Management, Inc. offers an attractive base salary, mileage reimbursement, and an excellent benefits package which includes an ESOP (Employee Stock Ownership Plan).
