

Database Engineer – Watertown, MA

For nearly a century [Barclay Water Management, Inc.](#) has been recognized as a leading provider of water treatment programs to protect water and steam heat exchangers and related piping systems. The company's Environmental Group develops custom water hygiene programs to minimize the risks associated with Legionella bacteria and other waterborne pathogens in building water systems. A closely controlled water treatment program is an essential element in every streamlined facility. We focus on providing clients with superior, cost-effective water treatment products and services, delivered by some of the most experienced and educated water treatment engineers. We are currently looking for a Database Engineer to work in our production facility in Watertown, MA.

Responsibilities include:

- Remotely monitor secondary water disinfection equipment
- Maintain My SQL database
- Retrieve information from the My SQL database using VBA Script in Excel
- Collect and review data to submit for state regulated reporting
- Configure new units in the My SQL database & SCADA software
- Other duties as assigned by manager

Qualifications include:

- B.S. in Engineering/Computer Science or a related field preferred with 1-6 years of experience
- Experience with My SQL Database
- Experience using VBA
- Experience with PLCs is a plus
- Strong relationship management skills
- Self-driven
- Excellent oral and written communication skills
- Must be authorized to work in the United States

Barclay Water Management, Inc. offers a competitive salary and benefits package including an ESOP (Employee Stock Ownership Plan). Qualified Database Engineer candidates are encouraged to send a cover letter and resume to our Human Resources Department at careers@barclaywater.com.
